PROFILE

I'm a frontend developer and currently finishing my Bachelor degree in Computer Application. I have experience with web technologies like HTML, CSS, and JavaScript etc and I enjoy creating user-friendly and responsive websites. I'm excited to keep learning and improving my skills, and I'm looking forward to working in environments where I can grow as a developer

WORK EXPERIENCE

E-Commerce Wordpress Website

I successfully designed and developed a WordPress e-commerce website for a fashion and clothing online store. Leveraging my expertise in web development, I implemented responsive design, optimized performance, and integrated secure payment gateways to enhance user experience and drive online sales

Restaurant Website

I developed a fully responsive restaurant website using HTML, CSS, and JavaScript, ensuring seamless functionality across various devices. The website includes interactive features, user-friendly navigation, and a visually appealing design, optimizing the overall user experience.

Fictional Shop website

Developed a fully responsive fictional website using HTML, CSS, JavaScript, and Bootstrap in under 3 hours. The project demonstrated efficiency in leveraging Bootstrap's grid system, ensuring mobile-first responsiveness, and integrating custom JavaScript for interactive elements. Successfully delivered a high-quality user experience within a tight deadline

Graphic Designs

Designed a variety of creative and unique graphic designs, showcasing innovation and versatility. Portfolio available for review

News Website Design

I developed a news website using React, focusing on creating a dynamic and responsive interface. The project emphasized efficient content rendering and user-friendly navigation, showcasing her proficiency in modern web development frameworks.

Weather App and To-Do-List App

I developed small projects, including a weather app and a to-do list app, using JavaScript, focusing on functionality and interactivity to enhance user experience.
